Kowloon, Hong Kong
Tel: 852-27309851
Email: hkea@exporters.org.hk
Website: www.hkexporters.org.hk
Product Description: - To liaise with government and represent the interests of exporters on a number of important councils and committees.
- To assist members to explore new market opportunities & to keep abreast of latest market intelligence.

Asia Exhibition of Innovations and Inventions Hong Kong

A&B Innovation, Faculty of Agro and Bio Industry, 1E-B37
Thaksin University
Invention Name: The innovative anthocyanin-rich extract from Sangyod rice bran for application in cosmetic products
Tel: 66 9 5438 6657
Email: pornvichai.t@tsu.ac.th
Website: https://abi.tsu.ac.th
Product Description: This innovation is the development of an extract with high anthocyanin content using organic Sangyod rice bran, a brown rice from Thailand, as raw material through an extraction process using green technology. The extract has a high antioxidant, antiaging, and moisturising properties which used as an active ingredient in facial skin care products.

Allied Success Technology Development Limited 1D-F17
滙興科技發展有限公司
Invention Name: Eco-permeable Material With Recycled Rubber Tyre Crumb and Geopolymer
Tel: 852 2845 1768
Fax: 852 2501 0230
Email: enquiry@astd.com.hk
Website: https://www.astd.com.hk/
Product Description: This cutting edge material features an eco-permeable core constructed from sustainable materials, reinforced by a geopolymer matrix. And supported by a robust frame, allow impressive porous or drain capabilities (subject it the drainage system underneath) to address the challenges of blockages and corrosions.

Automotive Platforms and Application Systems (APAS)
R&D Centre
汽車科技研發中心
Invention Name: Development of PEM fuel cell technology platform for EV mobile charging system 1D-B07
Tel: 852 2788 5333
Email: apas_info@hkpc.org
Website: https://www.apas.hk/
Product Description: Hydrogen fuel cell powered charger takes hydrogen gas as energy source to provide electrical energy to EVs for driving. By transferring hydrogen energy into electrical energy, the charger can be operated off-grid, producing electrical energy without pollutant and greenhouse gases but only small amount of heat and water.

Invention Name: Development of Pantograph High Power Charging Solution for Electric Commercial Vehicles 1D-B13
Tel: 852 2788 5333
Email: apas_info@hkpc.org
Website: https://www.apas.hk/
Product Description: The solution can provide 6 to 8 times faster charging speed than an ordinary 50kW quick charger. It only takes 8 minutes to charge the Pure Electric Minibus up to 80% battery level, without stepping out of the vehicle to plug-in charging gun into the socket.

Bioneer Corporation 1D-F15
Invention Name: IRON-qPCR™
Tel: 82 429396333
Fax: 82 429396444
Email: marketing1@bioneer.co.k
Website: https://eng.bioneer.com/
Product Description: IRON-qPCR™ is Point-of-Care molecular diagnostics system offering complete automation, from sample input to DNA/RNA extraction, PCR, and result analysis. With 40-multiplexing capacity, it enables rapid and precise syndromic diagnosis. Notably, IRON-qPCR™ pioneers the use of a block-based heat transfer method in PCR, ensuring accurate results regardless of environmental temperature fluctuations.

Centre for Eye and Vision Research
眼視覺研究中心
Invention Name: ObstAR 1D-F21
Tel: 852 5208 6310
Email: amm@cevr.hk
Website: www.cevr.hk
Product Description: ObstAR delivers obstacle detection, object recognition and distance measurement functionality to visually impaired patients via latest Augmented Reality (AR) software approaches. These functions are designed to assist visually impaired patients navigate their environments. ObstAR is a software solution made to be integrated with existing hardware products.

Invention Name: Structured Light Observation, Perception and Evaluation (SLOPE) device 1D-F23
Tel: 852 5208 6310
Email: amm@cevr.hk
Website: www.cevr.hk
Product Description: SLOPE is a robust diagnostic device that utilizes quantized spin-orbit light beams to generate specific patterns. The visual perception of these patterns strongly depends on the health of the macular outer layers. Hence, early functional changes preceding irreversible anatomical alterations of age-related macular degeneration (AMD) can be detected and prevented.

Chaobei Tools (Shandong) Co., Ltd. 1D-B04
朝倍工具(山東)有限公司
Invention Name: Electric negative pressure suction plate
Tel: 86 18661712060
Email: 9814007@sohu.com
Product Description: Full environmental protection material, increase suitable for dark, strong light, water, dust environment construction function. Improve energy saving, long battery life, hold degree, enhance convenient operation.

Email: j_jerasak@hotmail.com

Product Description: Maintaining a safe and clean environment is crucial for our health and well-being. With the increasing focus on environmentally friendly products, a revolutionary solution has emerged in the form of a dust-cleaning, germ-preventing, reusable slime called the G.G.G. This innovative product not only helps to eliminate dust particles but also provides a barrier against germs with help from its textural construction and unique scientific compartments.

Invention Name: O-NE CASE air purifier 1D-F46
Tel: 66 8 4639 6363

Email: j_jerasak@hotmail.com
Product Description: O-NE CASE is an air purifier with the combination of HEPA/Carbon filter (to filtrate particles including PM2.5) and UVC lamps (for germicidal function). The machine is compact in size30, light weight and has a luxurious design. It comes with an air quality and PM2.5 reader on display.

Chulalongkorn University

Invention Name: BioCa: Plant Bio-Calcium Booster 1E-A30
Tel: 66 9 4434 9900
Email: sanong.e@chula.ac.th

Product Description: BioCa is a calcium supplement for plants. Waste oyster shells were transform into organic acid calcium salts by reacting with wood vinegar. BioCa calcium ions make cell wall of leaf, flower, and fruit healthy and insect tolerant. Its organic compounds also function as plant hormones increasing crop yields and quality.

Invention Name: OxyRock 1D-F42
Tel: 66 8 4639 6363

Product Description: Through innovative repurposing, this project converts discarded green mussel shells into high-value products, including decorative stone crafted from pure calcium carbonate. These shells, typically landfill-bound, harm the environment. Unique processes extract calcium carbonate for use in cosmetics and agriculture, reducing ecological impact. Moreover, the project introduces an air-purification feature using titanium dioxide, enhancing aesthetics and sustainability. 3D printing enables custom designs, elevating decorative stone production. This initiative aligns with circular economy principles, promoting sustainability and economic growth, addressing UN Sustainable Development Goals.

Invention Name: WELL Weaver : Weaving Invention for Wellbeing and Sustainable Decoration 1D-F44
Tel: 66 865 650 577

Product Description: WELL weaver is an invention that help people of all ages to engage in weaving activities enjoyably. It helps unskillful people to accomplish beautiful weaving craft which benefits their wellbeing. It also can apply with BCG Economy and Circular Economy for sustainable creative economic development by upcycling leftover materials from the garment industry into valuable handicrafts.

City University of Hong Kong 香港城市大學

Invention Name: ClusterAD: Method of Presenting Flight Data of an Aircraft and a Graphical User Interface for Use with the Same 1D-B16

Product Description: Novel method for analyzing flight data and outputting common data patterns using artificial intelligence to identify abnormal flights. Software based on this invention allows users to (1) view available flights and the current status of an aircraft fleet, (2) configure and perform flight data analysis, and (3) view analysis results.

Invention Name: Solar-Electrocatalytic System for Hydrogen Generation 1D-C01

Product Description: Solar-powered water-splitting platform for efficient green hydrogen production. The platform combines photovoltaics with a highly efficient and stable dual anode-cathode, made from a novel 3D porous micro-nano-structured material.

Invention Name: Multi-Site Integrated Power Converters for DC Distribution Networks of Data Centers 1D-B10

Product Description: Efficient and reliable 50-kW power conversion system for DC power distribution networks in data centers using nanocrystalline SiC DC-DC converters for 380V to 48V conversion and GaN device MAD converters for 48V to 4V conversion.

Invention Name: Ice Transfer for 2D Materials and Ultra-clean Semiconductor Device Manufacture 1D-B12

Product Description: Method to use water ice as the supporting material to transfer 2D materials from growth substrates to target substrates. The 2D materials transferred by ice have much higher cleanliness than those transferred by conventional methods, and micro-devices fabricated from ice-transferred 2D materials show improved performance.

Invention Name: Selective Oil-absorbing Eco-Friendly Materials Developed by Simple Chemical Modification 1D-C04

Product Description: 100% biodegradable oil-absorbing materials prepared using simple chemical modification methods. These materials have highly selective oil-absorption properties, making them a cost-effective and sustainable solution for water-oil separation and oil waste treatment. Importantly, >90% of the absorbed waste oil can be recycled.

Invention Name: Negative Reactance: A Game Changing Device for Power Applications 1D-B02

Product Description: Standalone negative reactance, a previously absent concept in the real world, has been successfully developed. While negative power inductance has been indirectly created by embedding it within a positive inductance, this new development allows for direct cancellation of real inductance in power applications. Existing complicated compensation design methods will be revolutionized by this new device.

AniTech Limited 1D-C11
安神科技有限公司

Invention Name: An AI-assisted EEG Analysis Platform for Drug Screening

Tel: 852 3442 2031
Email: vivianchu@anitech.hk
Website: www.anitech.hk
Brand Name: HK Tech 300
Product Description: Our artificial intelligence-based electroencephalogram (AI-EEG) platform facilitates novel drug development to ensure drug efficacy and safety by detecting adverse side effects using brain EEG activity from animals and humans. It greatly reduces barriers and high costs on drug development, saving time and cost for subsequent pre-clinical animal studies and clinical trials.

<p>Arbele Limited 艾貝樂醫藥科技有限公司 Invention Name: ARB202 - A Promising and Novel CDH17xCD3 Bispecific T-cell engager for the Treatment of Advanced GI Cancers Tel: 852 3620 3002 Email: info@arbelebio.com Website: www.arbelebio.com Brand Name: HK Tech 300 Product Description: Our patented CDH17 cancer marker is prevalent in gastrointestinal cancers and its overexpression correlates with poor prognosis. Our lead asset, ARB202, is a first-in-class CDH17xCD3 bispecific T-cell engager, currently in Ph1 clinical trial. Early data shows ARB202 to be safe in patients and suggest potential therapeutic effects for GI patients.</p>	1D-C07	<p>I2COOL Limited 創冷科技 Invention Name: Electricity-free Cooling Technology Tel: 852 5705 8603 Email: info@i2cool.com Website: https://i2cool.com/ Brand Name: HK Tech 300 Product Description: Electricity-free Cooling Paint (iPaint) is capable of reducing the surface and indoor temperatures of buildings, automobiles, outdoor electronic equipment without electricity. Unlike traditional paint, where it absorbs sunlight and heat, iPaint achieves cooling effects below ambient temperature through high solar reflectivity of 95.06% and efficient high mid-infrared emissivity of 95.2%.</p>	1D-C14
<p>ASA Robotics Limited Invention Name: Luna Cat Tel: 852 6658 8308 Email: contact@asa-robotics.com Website: www.asa-robotics.com Brand Name: HK Tech 300 Product Description: LUNA, the intelligent fall-prevention caregiving robot, is a remarkable non-camera robotic cat equipped with artificial intelligence and 'Internet of Things' capabilities. Whenever a patient attempts to leave their bed, LUNA emits personalized voice prompts, skillfully diverting their attention and encouraging them to remain in bed while they await assistance.</p>	1D-C09	<p>InnoSpire Technology Limited 創啟社會科技有限公司 Invention Name: WeVoice Glasses Tel: 852 6938 4827 Email: kelvinsiu@techinnospire.com Website: https://www.techinnospire.com Brand Name: HK Tech 300 Product Description: WeVoice Glasses are smart glasses that, when connected via Wi-Fi to the WeVoice Plus smartphone application, provide audio feedback for vision-impaired users. For example, the artificial intelligence-assisted app can read aloud text in the user's field of view.</p>	1D-C16
<p>CAT Limited 催化科技有限公司 Invention Name: Nano-MAP: High-performance Eco-friendly Nano-photocatalytic Coating Email: info@cattech.io Website: www.cattech.io Brand Name: HK Tech 300 Product Description: Biofouling affects all maritime vehicles and facilities. This novel paint coating adopts nano-photocatalysis to effectively and ecologically perform hull antifouling under seawater. The paint additives – Nano-MAP – can fully replace conventional heavy metal-based biocides and increase fuel efficiency by 30%.</p>	1D-C10	<p>ITsci Company Ltd. 創新進領有限公司 Invention Name: Alstain: AI Virtual Immunostaining for Diagnostic Pathology Email: support@ai-stain.com.hk Website: www.ai-stain.com.hk Brand Name: HK Tech 300 Product Description: In diagnostic histopathology, immunostaining is a crucial procedure but can be time-consuming and complex. Alstain is a cloud-based generative artificial intelligence image-processing and classification tool for virtual immunostaining of cell and tissue samples, enabling reduced diagnosis time and providing accurate predictions, even for those worldwide without access to expensive immunostaining laboratory equipment.</p>	1D-C13
<p>Doctech HK Limited 香港鉞識科技有限公司 Invention Name: Nanotwinning-assisted Structurally Stable Copper for Fine-pitch Redistribution Layer in 2.5D/3D IC Packaging Brand Name: HK Tech 300 Product Description: This structurally stable hybrid fine grain and nanotwin copper structure can effectively resist surface corrosion and minimize copper surface damage even after a long q-time, offering a promising solution for superior redistribution layer in advanced packaging technologies.</p>	1D-B08	<p>Micro Sensing and Imaging Technologies Limited 微感成像科技有限公司 Invention Name: Multispectral Tonoateriography Imaging Device and Method Tel: 852 96385603 Email: zijunliu4-c@my.cityu.edu.hk Brand Name: HK Tech 300 Product Description: Multiwavelength spectroscopy-based tonoarteriogram using optical imaging technology for non-invasive dynamic blood-pressure measurement. This technology bridges the gap between one-dimensional signals and two-dimensional imaging, making it a highly promising advancement in the field of blood pressure monitoring.</p>	1D-C05
<p>HK Super Carbon Nano Technology Limited 香港超碳納米科技有限公司 Invention Name: Gram-scale Pyrolytic Self-driven Synthesis of Carbon Nanotubes Brand Name: HK Tech 300 Product Description: Carbon nanotubes have excellent electrical conductivity, high strength, and light weight, but they are expensive to manufacture. Our newly developed pyrolytic self-driven synthesis process reduces the cost of manufacturing carbon nanotubes to one-fifth or even one-tenth that of existing methods.</p>	1D-C12	<p>NerOcean Limited Invention Name: A New Generation of Dissolved Oxygen Sensor Using Replaceable Photo-sensing Film Email: ngco.ron@nerocean.com Website: https://nerocean.com/ Brand Name: HK Tech 300 Product Description: Novel class of dissolved oxygen-sensing films and devices developed using a new dissolved oxygen sensing method. These devices are unaffected by biofouling, thus providing cost-effective dissolved oxygen monitoring in large water bodies, contributing to the sustainable development of the ocean.</p>	1D-C06

<p>S3Tough Tech Co. Limited Invention Name: Super-Tough Artificial Spider Silk Brand Name: HK Tech 300 Product Description: Super-high toughness polyurethane and polyurea fiber, inspired by the secondary structure of spider silk, prepared by chemical synthesis, with potential application as a high-strength textile, such as in sportswear, body armor, or safety belts.</p>	1D-C20	<p>Confo Quanta 共聚量子 Invention Name: Nanofabrication Techique by Direct Laser Patterning Tel: 852 5392 4482 Email: ng1712204721@gmail.com Product Description: A direct laser nanofabrication technique allows material deposition or removal without any mask in ultra-precision. This technique could be applied to highly customized semiconductor devices, photonic devices, wearable devices or the jewelry industry.</p>	1D-D25
<p>Seth Biotech Limited 賽特生物科技股份有限公司 Invention Name: Three-dimensional Copper-based Filter with Fast Virus Elimination Brand Name: HK Tech 300 Product Description: High-performance copper-based filter designed to rapidly eliminate viruses and other air-borne microbial pathogens , offering enhanced protection in various applications.</p>	1D-C15	<p>Digital Continents Limited 數字大陸有限公司 Invention Name: epiz: the ultimate platform to unlock data values Email: digital.continents@gmail.com Product Description: ezpie is a one-stop platform connecting data projects with top-tier talent. ezpie fosters a data ecosystem that optimises client-expert matches, offering a secure workspace for data collaboration. Featuring built-in data visualisation, the fusion of web3.0 and generative AI underpins data security, driving global data analytics. With ezpie, we securely and creatively shape the digital future.</p>	1D-D27
<p>SmartSkyBuilder Invention Name: CitySkyPlan: AI Algorithms for Drone Delivery Routes and Traffic Management Brand Name: HK Tech 300 Product Description: Artificial intelligence methods and algorithms for air traffic management of unmanned air vehicles, generating collision-free air route networks to support large-scale drone operations in urban low-altitude airspace.</p>	1D-B14	<p>Digitized Cleaner Cities Lab, Peking University 數字清潔城市實驗室 Invention Name: Dynamic Urban Simulator Tel: 86 15001374497 Email: h.zhang@pku.edu.cn Website: https://www.pkudccl.com/ Product Description: The Small world AI project is an integrated and comprehensive data mining system that can smoothly give full play to synergies of multiple technologies, which accurately simulate real-world human mobility behaviors. It contains six modules to construct an unbiased and desensitized virtual world to simulate the real world.</p>	1D-E20
<p>Sramek Insight Limited 瑞脈科研有限公司 Invention Name: Wearable Noninvasive Cardiovascular Sensor Tel: 852 2488 8168 Fax: 852 2488 8108 Email: sramekinsight@gmail.com Website: www.sramekinsight.com Brand Name: HK Tech 300 Product Description: Cardiax Skin is a graphene-based electronic sensor that measures continuous and real-time hemodynamic data while being very precise and repeatable. Cardiax Skin is ultrathin and soft which can replace traditional electrode pads for hemodynamic monitoring, which simplifies the operation of measuring impedance cardiography and blood pressure.</p>	1D-C18	<p>Electrical and Mechanical Services Department 機電工程處 Invention Name: Use of Artificial Intelligence, Drone and Remote Sensors for Tower Inspections Tel: 852 2808 3503 Email: inno@emsd.gov.hk Website: https://www.emsd.gov.hk/tc/about_us/index.html Product Description: Workers used to climb up towers for visual inspection. This invention deploys a drone to capture photos of tower and build 3D model. AI engine would then analyse photos for identifying defects and compare the 3D models for knowing the deformation. Sensors were also installed at Site for remote monitoring.</p>	1D-D03
<p>Super Bamboo Limited 超竹有限公司 Invention Name: Super Bamboo: High Performance Non-toxic Low Embodied Carbon Engineered Bamboo Material Tel: 852 5624 6849 Email: info@thesuperbamboo.com Website: https://www.thesuperbamboo.com Brand Name: HK Tech 300 Product Description: Super Bamboo is an award-winning material that is 350% stronger than normal bamboo, beating industrial steel and titanium alloys. Super Bamboo uses a breakthrough manufacturing method using no formaldehyde or other toxic chemicals. Super Bamboo has potential applications in the furnishings, construction, automobile, and even aerospace industries.</p>	1D-C08	<p>Invention Name: City-level Robotic Inspection and Diagnostic System for Building Systems Tel: 852 2808 3503 Email: inno@emsd.gov.hk Website: https://www.emsd.gov.hk/tc/about_us/index.html Product Description: Building E&M Robotic AI Neural (BRAIN) System - An innovative approach & integration of Robotic Fleet, Semantic AI, Big Data Analytic and Building Information Modelling for diagnostic of building E&M systems and best management of E&M assets in city-level.</p>	1D-D05
<p>Wearable Intelligent Sensing Technologies Limited Invention Name: A Tonoarteriography-based Close Loop Drug Delivery Device for the Monitoring and Therapy of Hypertension Tel: 852 6818 2305 Email: ytzhang@cuhk.edu.hk Brand Name: HK Tech 300 Product Description: Novel tonoarteriography-based closed-loop drug delivery devices, utilizing intelligent sensing technologies, aims at addressing the need for personalized and precise medicine delivery for hypertension management. Target users include individuals with cardiovascular risks and hypertensive patients.</p>	1D-C03	<p>Invention Name: A.I. Real-time Lift Door Inspection System Tel: 852 2808 3503 Email: inno@emsd.gov.hk Website: https://www.emsd.gov.hk/tc/about_us/index.html Product Description: The device monitors the lift doors by measuring their moving speed, noise, alignment and captures images and videos. Data are analyzed by AI algorithms, enabling continuous monitoring of the landing doors. 7x24 continuous automated inspection reduced work in lift shaft enhances work safety and service interruption through data driven maintenance.</p>	1D-D07

參展商名單 (按英文名稱排列)

Alphabetical List of Exhibitors

Invention Name: Smart Antifouling Seawater Screen 1D-D09
Tel: 852 2808 3503
Email: inno@emsd.gov.hk
Website: https://www.emsd.gov.hk/tc/about_us/index.html
Product Description: Eco-friendly novel invention suppresses seawater screen fouling, thus enhances an Air-conditioning plant efficiency and unleashes manpower by 80%. Other antifouling marine application is promising. This invention not only optimizes maintenance strategy for maximising cooling system uptime, but also enables Hong Kong as a new paradigm for smart maintenance.

Invention Name: AI Voicebot Training System with Performance Evaluation for Call Centre Agents 1D-D11
Tel: 852 2808 3503
Email: inno@emsd.gov.hk
Website: https://www.emsd.gov.hk/tc/about_us/index.html
Product Description: This system offers a novel mode to train and evaluate call centre agents, with AI enabled Natural Language Processing technologies. It adopted the AI marking scheme to rank agents.

Invention Name: 3D printed Trap case and T-Shaped Bait Box for rodent control and management 1D-D13
Tel: 852 2808 3503
Email: inno@emsd.gov.hk
Website: https://www.emsd.gov.hk/tc/about_us/index.html
Product Description: Effective rodent control is challenging. The redesigned 3D-printed trap cases with see-through windows minimize rodent alertness. They feature handlers and slide bars for safe and efficient trap removal in high-rise areas. Meanwhile, the integration of IoT sensors at T-shaped bait box allows for automatic recording of bait consumption, real-time alerts, and improved management and analysis capabilities.

Eternal Technology Concept Limited 1D-B06
Invention Name: ETBadge
Tel: 852 9780 7723
Email: ejoetso@gmail.com
Website: <http://etbadge.com>
Product Description: ET Badge is a platform to issue digital certificates, verify authenticity, manage and share certificate documents in a simple and efficient way. Our solution in counterfeit greatly benefits both employers and employees.

Federal State Autonomous Institution "National Medical Research Neurosurgical Center named after Nikolay Burdenko" of the Ministry of Health of the Russian Federation 1D-F19
Invention Name: Method of optic nerve reconstruction with autograft
Tel: 7 499 972-86-68
Email: nsi@nsi.ru
Website: <https://www.nsi.ru/>
Product Description: The invention restores the anatomical integrity of the optic nerve, including growth of axons combined with restoring its electrical conductivity, by sewing an autoneurone fragment into the optic nerve defect. Introducing technology into medicine (neurosurgery, ophthalmology, plastic surgery, regenerative medicine) will restore visual functions of the patients with the optic nerves damaged by injury, oncological diseases, etc.

Hong Kong Applied Science and Technology Research Institute Company Limited
香港應用科技研究院有限公司
Invention Name: Full-dome laser scanner 1D-D04
Tel: 852 3406 2800
Fax: 852 3406 2801
Email: corporate@astri.org
Website: <https://www.astri.org/>
Product Description: A laser scanner, which utilized a threshold-based sampling method to digitize the laser signal and increase accuracy. The device can realize 360 degree scanning and reconstruct 3D geometry surrounding the scan location.

Invention Name: Optical Security Label for anti-counterfeit, data encryption & storage 1D-C02
Tel: 852 3406 2800
Fax: 852 3406 2801
Email: corporate@astri.org
Website: <https://www.astri.org/>
Product Description: a) Flexible diffractive nanostructures with angular multiplexing features. b) Multilevel authentication system combining both physical and digital security. c) Photonics enabled AI for encrypted data reconstruction and image enhancement

Invention Name: Long-Wave Infrared Imaging Metalens 1D-D06
Tel: 852 3406 2800
Fax: 852 3406 2801
Email: corporate@astri.org
Website: <https://www.astri.org/>
Product Description: Long-wave infrared (LWIR) light carries the information of temperature. Capturing LWIR image enables various applications. We have therefore developed a compact optical design for LWIR camera with metalens. The LWIR metalens is made with Si through a photolithography process. The mass-production potential makes the metalens favorable compared to traditional lenses.

Invention Name: Smart Contactless Robot Charging (SCRC): A High-Efficiency & Compact Wireless Charging Platform for Industrial Robotics 1D-D01
Tel: 852 3406 2800
Fax: 852 3406 2801
Email: corporate@astri.org
Website: <https://www.astri.org/>
Product Description: A 1-kW medium-range wireless charging platform for industrial robotics features high efficiency, high power density, improved charging distance with misalignment tolerance, possessing 90% power-grid-to-rectifier energy efficiency, 40% volume reduction, and dramatically up to 100mm charging distance, enabling labour cost effective, productive, and fully automated 24x7 operation for smart industry applications.

Invention Name: Advanced lighting system for large-scale green architecture applications 1D-D08
Tel: 852 3406 2800
Fax: 852 3406 2801
Email: corporate@astri.org
Website: <https://www.astri.org/>
Product Description: A very efficient large scale lighting system powered by advanced direct current (DC) power conversion, protection, and cloud-based monitoring and control technologies for green architecture applications. A sustainable solution that best fit with photovoltaic power and battery storage integrations to achieve zero CO2 emission DC architecture.

參展商名單 (按英文名稱排列)

Alphabetical List of Exhibitors

Invention Name: Time-Sensitive 5G Communications for New Industrialisation 1D-D10

Tel: 852 3406 2800

Fax: 852 3406 2801

Email: corporate@astri.org

Website: <https://www.astri.org/>

Product Description: This invention enables Time-sensitive Communication on 5G network by two novel time synchronization methods. Comparing with conventional best effort based 5G network, this invention can achieve ultra-low jitter and latency, and high throughput for time critical applications such as manufacturing automation, healthcare, and intelligent transportation etc.

Invention Name: 5G Multi-Hop Backhaul for Smart Cities and Rural Communications 1D-D12

Tel: 852 3406 2800

Fax: 852 3406 2801

Email: corporate@astri.org

Website: <https://www.astri.org/>

Product Description: This invention addresses the communications infrastructure design and enabling technologies for flexible and cost effective 5G network deployment for smart cities and rural communications. Wireless multi-hop backhaul link is achieved with high data rate and self-organizing wireless technologies. Error accumulation over multi-hop backhaul link is mitigated with network coding technologies.

Invention Name: Method and Apparatus for Virtual Avatar Generation 1D-D02

Tel: 852 3406 2800

Fax: 852 3406 2801

Email: corporate@astri.org

Website: <https://www.astri.org/>

Product Description: In response to the growing fascination with fashion, people are looking for ways to visualize their desired avatar by blending facial and voice features from different individuals. Our invention enables users to personalize virtual avatars feature-wise by fusing faces and voices. Fine-tuning is possible by adjusting each feature weight.

Invention Name: Image Processing Method For Multi-frequency Ultrasound Probe Device 1D-E01

Tel: 852 3406 2800

Fax: 852 3406 2801

Email: corporate@astri.org

Website: <https://www.astri.org/>

Product Description: An ultrasound image processing method based on embedded SoC, supporting dual and triple miniature ultrasonic probes. The dynamic filter in the preprocessing module and the wavelet imaging fusion algorithm in the post-processing module are different from other methods. This innovation reduces the overall cost of the system while improving image quality.

Hong Kong Industrial Artificial Intelligence & Robotics Centre (FLAIR)

香港工業人工會能及機械人研發中心

Invention Name: AssemblyWise: Intelligent Sequence Planning 1D-A16

Tel: 852 3978 2916

Email: marketing@hkflair.org

Product Description: AssemblyWise application cuts the time to market for newly introduced products. It automates tedious and manual assembly sequence planning for industrial product designers. Data is extracted from CAD files, constraints are modelled and assembly sequences are generated using AI. AssemblyWise's patented algorithms are embedded in an easily accessible cloud application.

Invention Name: Logistics Process Intelligent System 1D-B15

Tel: 852 3978 2916

Email: marketing@hkflair.org

Product Description: In cooperation with Hactl, FLAIR presents the Logistics Process Intelligent System, a revolutionary software that boosts the uptime and maintenance efficiency of conveyer-based logistic centers. This is the first bottleneck management platform for logistics centers using process mining and advanced algorithms to detect, identify, and analyse historical and/or real-time data.

Hong Kong Productivity Council

香港生產力促進局

Invention Name: Cutting-Edge Aluminum-Silicon Casting Alloy with Superior Thermal Conductivity and Minimal Thermal Expansion 1D-B03

Tel: 852 2788 5678

Fax: 852 2788 5900

Email: hkpcenq@hkpc.org

Website: www.hkpc.org

Product Description: A game-changing die-castable Al-Si alloy designed for efficient thermal management in electronics. Extends battery life by 20%, safeguards against overheating, and reduces crash damages. Its remarkable production cost reduction of over 40% and readiness for rapid volume production render it an optimal selection for widespread adoption across various industries.

Invention Name: Develop Smart Logistics Solution with Autonomous Moving Robots 1D-B09

Tel: 852 2788 5678

Fax: 852 2788 5900

Email: hkpcenq@hkpc.org

Website: www.hkpc.org

Product Description: The proposed project is the first smart warehouse solution applied in Hong Kong by utilising the corporation of the different types of AMRs. It is specifically developed to solve the demand for small to medium - scale warehouses. The solution aims to autonomously pick goods from multi-layer storage racks with great dexterity.

Invention Name: Power-hawk Inspector: A Drone-based Power Grid Defect Inspection Equipment using Federated and Few-shot Learning 1D-B05

Tel: 852 2788 5678

Fax: 852 2788 5900

Email: hkpcenq@hkpc.org

Website: www.hkpc.org

Product Description: The invention is a drone with AI to detect tiny defects for the electrical grid. It replaces traditional human inspection and saves 80% time. Our invention only requires small number of samples to train the AI, and edge computing is being used which reduces the power consumption by 50%.

Invention Name: Super Mario Bros - Mario & Luigi Firefighting Support Mobile Robots 1D-B11

Tel: 852 2788 5678

Fax: 852 2788 5900

Email: hkpcenq@hkpc.org

Website: www.hkpc.org

Product Description: Empowering Firefighters: Indispensable Allies - Mario uses visible and infrared cameras with edge AI technology to assess on-site risks, identify survivors and fire zones. Firefighters can control Mario remotely to extinguish fires. - Luigi provides logistics and accident support to transport heavy equipment and evacuate the injured with a rescue stretcher.

參展商名單 (按英文名稱排列)

Alphabetical List of Exhibitors

- io.net, inc.** **1D-E22**
Invention Name: io.net Internet of GPUs
 Tel: 1 347 880 0958
 Email: shadid@io.net
 Website: https://io.net
 Product Description: Unified compute network for scaling ML workloads elastically across globally distributed decentralized GPU infrastructure.
- King Mongkut's University of Technology Thonburi**
Invention Name: Bone substitute with biodegradability control for enhancing bone integration efficiency in Orthopedic treatment **1E-B33**
 Tel: 66 2470 9111
 Email: anak.kha@kmutt.ac.th
 Website: www.kmutt.ac.th
 Product Description: Biphasic calcium phosphate bone substitute materials, synthesized to have two main components, hydroxyapatite and beta tricalcium phosphate, exhibit different properties such as load-bearing capacity and biodegradability within the body. When these two components are proportionally adjusted and shaped as needed, they can significantly enhance the efficiency of rehabilitating various bone structures.
- Invention Name: Portable oxygen canister for enhanced freshness and disease prevention** **1E-B35**
 Tel: 66 2470 9111
 Email: anak.kha@kmutt.ac.th
 Website: www.kmutt.ac.th
 Product Description: Innovation in portable oxygen canister, which can enhance freshness and prevent diseases with the unique extracts of menthol and eucalyptus. This compact portable oxygen canister delivers pure oxygen that helps you create a healthy environment with convenience anytime, anywhere. Breathe easily and feel refreshed with the convenience of our portable oxygen canister.
- King Mongkut's Institute of Technology Ladkrabang** **1E-A34**
Invention Name: Vertical planting set with root watering system
 Tel: 66 95 885 8899
 Email: monsinee.at@kmitl.ac.th
 Website: www.kmutt.ac.th
 Product Description: From the concept of food security in developing countries and to control resource usage, the local knowledge and technology were combined. In order to find the perfect balance between traditional agriculture and high technology. The vertical planting set that the nutrients from the soil was absorbed without using chemical fertilizers, the root watering system reduces water loss and uses low energy.
- Logistics and Supply Chain MultiTech R&D Centre**
物流及供應鏈多元技術研發中心
Invention Name: RFID Device (Two-piece Device for Tolling Application) **1D-E23**
 Tel: 852 3973 6200
 Email: info@lscm.hk
 Website: www.lscm.hk
 Product Description: LSCM developed and deployed "2-piece RFID tag" to meet the requirement in tolling application. LSCM developed the magnetic Snap-On design to hold the RFID card without compromising the RF performance.
- Invention Name: AIoT Herbal Picking and Delivery System for Traditional Chinese Medicine Hospital** **1D-E17**
 Tel: 852 3973 6200
 Email: info@lscm.hk
 Website: www.lscm.hk
 Product Description: The system leverages AI visual analytics for verification of Chinese medicine (CM), adopts IoT in traditional CM cabinet to assist in medicine picking and deploys robot for CM hospital logistics.
- Invention Name: AI Vision Technology for Heat Source Detection to Enhance the Effectiveness of Automated Hill Fire Surveillance** **1D-D26**
 Tel: 852 3973 6200
 Email: info@lscm.hk
 Website: www.lscm.hk
 Product Description: AI and robotic technologies are utilised to detect wildfires in country parks. Such an unique fusion of the methodologies for wildfire detection has been proven to be successful.
- Invention Name: Vehicle Detection and Alert System for Better Mobility** **1D-E25**
 Tel: 852 3973 6200
 Email: info@lscm.hk
 Website: www.lscm.hk
 Product Description: Traffic blockage often occurs when two large vehicles come from opposite sides at the same time. This system uses AI sensing technologies to trigger the traffic light signal to avoid deadlock or gridlock.
- Invention Name: Automated Concrete Cube Testing System** **1D-D28**
 Tel: 852 3973 6200
 Email: info@lscm.hk
 Website: www.lscm.hk
 Product Description: The system can complete the concrete cube compression test automatically. The process includes picking up the cube from the water tank, cube size measurement and compression test.
- Invention Name: Robo-9 with Multi-Sensor Technologies for Visually Impaired** **1D-E27**
 Tel: 852 3973 6200
 Email: info@lscm.hk
 Website: www.lscm.hk
 Product Description: The robot is a prototype built with advanced software and hardware infrastructure to improve the mobility of the Visually Impaired. With the integration of robot vision and sensing technologies, its functions include obstacle avoidance and navigation guidance for mobility assistance.
- Invention Name: Baby Tag and Baby Tracking Management Control System** **1D-E19**
 Tel: 852 3973 6200
 Email: info@lscm.hk
 Website: www.lscm.hk
 Product Description: The system is designed to be suitable for use in the hospital environment. It provides protection to babies against abduction by raising quick alerts when the unauthorized movement of babies or an attempt to tamper with the tag. Baby Tag is designed to fit snugly onto the baby's ankle for effective sensing.

參展商名單 (按英文名稱排列)

Alphabetical List of Exhibitors

Invention Name: Tele-practice Platform System 1D-E21

Tel: 852 3973 6200

Email: info@lscm.hk

Website: www.lscm.hk

Product Description: The system is a cloud-based IoT platform infrastructure to enable different tele-practice service providers, NGOs, and therapists to collaborate to deliver rehabilitation services for the people in need. NGOs can refer their service users to consult with therapists by making appointments through the platform, while therapists can perform remote video assessments to formulate a suitable treatment plan.

MT Natural Herb Company Limited 1E-B39

Invention Name: ME YOUNG medicinal soap by Thai traditional herbals for skin diseases treatments

Tel: 66 6 2258 9898

Email: inptw.rmutt@gmail.com

Product Description: ME YOUNG medicinal soap is a Thai traditional herbals soap for skin diseases treatments. It cleans the skin without harming it, and reduces inflammation, swelling, redness, and itching. It is suitable for people with chronic skin diseases such as psoriasis, eczema, ringworm, dermatitis, and allergic rashes. It contains gentle cleansing ingredients, and inhibits the growth of bacteria and fungi that cause skin diseases.

MTR Corporation Limited

香港鐵路有限公司

Invention Name: AI Sensors Fusion Technique in Train Bogie Maintenance 1D-A06

Tel: 852 2881 8888

Fax: 852 2795 9991

Website: mtr.com.hk

Product Description: MTR have developed a sophisticated algorithm, leveraging advanced data mining and machine learning techniques. This innovation algorithm accurately predicts high vibration anomalies in train bogies, utilizing data from the Point Vibration Monitoring System. Its dependability and informativeness have been proven by comparing vibration data before and after maintenance interventions.

Invention Name: Real Time Computer Vision Based Inspection Device for Escalator Clearance 1D-A04

Tel: 852 2881 8888

Fax: 852 2795 9991

Website: mtr.com.hk

Product Description: To ensure escalator's smooth operation, distance of gaps between escalator steps are regularly inspected to reduce the chances of small items from being trapped. This Escalator Clearance Inspection Device (ECID) offers a standardized, accurate and automated inspection solution to generate measurements data for escalators of various brand and models.

Invention Name: Automatic Railway Intelligent Shunting Application (ARISA) 1D-A08

Tel: 852 2881 8888

Fax: 852 2795 9991

Website: mtr.com.hk

Product Description: ARISA is an MTR developed portable video and LiDAR-based driving assistance system for heavy rail. A mobile interface developed in-house provides real-time alarm warnings through an innovative IoT solution. ARISA requires minimal changes to onboard systems and is certified for railway operation fulfilling both MTR and international standards

National Nanotechnology Center, Chulalongkorn University 1D-F48

Invention Name: Eco-Friendly flame-retardant filament for 3D printing

Tel: 66 2564 7100

Fax: 66 2564 6985

Email: chutiparn.ler@nanotec.or.th

Product Description: Plastic filaments with fire-retardant property for 3D printing made from ABS plastic mixed with calcium hydrogen phosphate. The finish goods with fire-retardant property can be 3D-printed. Zero-waste process has been used for production. This product is environmentally friendly and recyclable. The material is safe and has excellent fire-retardant property. The printed pieces are durable and can be used outdoors.

Pamela Youde Nethesole Eastern Hospital 1D-E24

東區尤德夫人那打素醫院

Invention Name: Advanced 3D Printing Technique with Ultrasound Visible and Haptical-Feedback Correct for High Risk Medical Procedure Training and Simulation with referenced to Artificial-Intelligent Segmented Normal Whole-body Library

Tel: 852 6460 0073

Email: tks886@ha.org.hk

Website: http://www.ha.org.hk/pyneh

Product Description: It is an advanced 3D Printing technique for making models for High Risk Medical Procedure Training and Simulation. The models created are Realistic, Ultrasound Visible and Haptical-Feedback Correct with referenced to an Artificial-Intelligent (AI) Segmented Normal Whole-body Library.

Princess Chulabhorn Science High School Pathum Thani

Invention Name: BSM : Innovative Friendly Bio-based Surfactants for Mangrove Conservation 1E-A38

Tel: 66 2599 4462

Email: ontact@pccp.ac.th

Website: www.pccp.ac.th

Product Description: Innovation in bio-based surfactants that can be used to restore oil-contaminated mangrove sediments, and is not harmful to the environment in the mangrove forest.

Invention Name: NRHP : Innovative High Efficiency Nursery Bags Supplement Nutrients for the Root Harvesting Plant 1E-A36

Tel: 66 2599 4462

Email: ontact@pccp.ac.th

Website: www.pccp.ac.th

Product Description: Tubers, or plants that use their roots as food, are popular for consumption in many countries. This innovation was therefore developed as a planting material in the form of a nursery bag that can release nutrients that can be used by plants in this group to make the bulbs grow larger, which increases productivity for farmers.

Simply Mask Ltd 1D-E16

Invention Name: Smart-hygiene Toilet Robot

Tel: 852 3728 1266

Fax: 852 3728 1268

Email: info@simplymask.com.hk

Website: www.simplymask.com.hk

Introducing the Smart-hygiene Toilet Robot, a transformative innovation by Simply Mask Ltd. This plug&play device enhances hygiene by implementing an 'Air Flush' function in traditional toilet, effectively eliminating 99% of aerosols (may contain pathogens) generated during toilet flushes. Redefining sanitation standards toward a cleaner & safer future.

參展商名單 (按英文名稱排列)

Alphabetical List of Exhibitors

- Soteri Technology Limited** 1D-D24
數太科技有限公司
Invention Name: Soteri Sensor & Cloud Platform
Tel: 852 9326 8183
Fax: 852 2691 8099
Email: queenie.ip@jfy.hk
Product Description: Our solution (includes the Soteri Sensor), is specifically designed to detect metal fatigue at an early stage and issue a warning before a catastrophic failure occurs. We also provide monitoring services for metal fatigue with our cloud platform.
- Suzhou SeeEx Technology Co.** 1D-A12
蘇州溯駁技術有限公司
Invention Name: An Intelligent Hydrogen-powered UAV with Safety Control
Tel: 0512-68799658
Email: suyu@seeextech.com
Website: www.seeextech.com
Product Description: Motivated by increasing demand for long-range aerial missions, an intelligent hydrogen-powered UAV with zero emission, long-endurance and safety control features is invented. The invention significantly increases the endurance of multi-rotor UAVs, and is capable of autonomous planning, rapid fault detection and safe landing, enabling long-endurance hovering missions that are previously impossible.
- Taizhou Hongda Electric Power Construction Co., Ltd.** 1D-A14
台州宏達電力建設有限公司
Invention Name: A Master-Slave Control Based Robot for Live-Line Composite Insulator Maintenance
Tel: 86 13736205294
Email: pengmin_2019@126.com
Product Description: This inventive device solves the problem of insufficient safety distance for traditional live-line composite insulator maintenance, realizes the remotely operation of composite insulators on different tower types, and ensures personal safety.
- Thammasat University**
Invention Name: Miracle concentrated curcumin facial cream 1E-B29
Tel: 66 6 5879 9555
Email: athinova6@hotmail.com
Product Description: Facial cream product from curcumin extract grown naturally without toxins. Curcumin extract is rich in antioxidants, delays aging, helps nourish and revitalize the skin. In addition, it has an anti-inflammatory effect, helps reduce sores and redness of the skin, reduces scars caused by various acne scars. The process of producing concentrated curcumin extract using an extraction method that is friendly to consumers, free from toxic residues to consumers and the environment by extracting in the form of nanoparticles which extract the molecule into Encapsulated Curcumin Extract, causing the extract to penetrate deeper and deeper into the inner skin structure. Suitable for people who have problems with blemishes, freckles, dark spots and a dull face. This product reduces redness, increase radiance and reduces wrinkles effectively. This product has been tested for toxicity to skin cells. It is also certified to GHPs&HACCP and FDA standards.
- Invention Name: Dietary supplement for damaged and degraded skin care** 1E-B31
Tel: 66 6 5879 9555
Email: athinova6@hotmail.com
Product Description: Dietary supplement in the form of capsules from concentrated curcumin and Indian gooseberry extracts grown naturally without toxins. The process of producing concentrated curcumin and Indian gooseberry extract using an extraction method that is friendly to consumers, free from toxic residues to consumers and the environment. Turmeric and Indian gooseberry are rich in antioxidants, helping to slow down aging, nourish and revitalize the skin, reduce the roughness of the skin, and enhance the skin's immunity. Suitable for people who have problems with damaged and degraded skin and desire to restore their skin to look youthful. Suitable for people who This product has been certified to GHPs & HACCP standards and FDA standards.
- Invention Name: Trace EBN: A Traceability Platform for Genuine Swiftlet Nest** 1E-A32
Tel: 66 6 5879 9555
Email: akkrit@tbs.tu.ac.th
Product Description: "Trace EBN" stands as an innovative traceability platform, empowering buyers to utilize their smartphones for swiftlet nest quality verification. Consumers gain access to comprehensive information about Swiftlet Nest's place of origin and its history, ensuring authenticity and source validation. This system ensures alignment with sustainable development goals for the farms involved. This cutting-edge technology will transform trading to the sustainability of the swiftlet nests industry.
- The Chinese University of Hong Kong**
香港中文大學
Invention Name: AI-guided and Personalised Fecal Microbiota Transplantation (FMT) Treatment for Human Diseases 1D-E03
Tel: 852 3943 7000
Fax: 852 2603 5544
Email: cpr@cuhk.edu.hk
Website: <https://www.cuhk.edu.hk>
Product Description: FMT is a medical treatment of transferring healthy microbiota to diseased patients to restore its balance. With deep sequencing and AI modelling, a Unique Microbiome Signature was identified. By matching these microbiome profiles signatures between the donors and the recipients, a more precise and effective FMT treatment will be delivered to the patients.
- Invention Name: Secretome derived from fetal goat stem cells under hypoxic condition for skin regeneration** 1D-E05
Tel: 852 3943 7000
Fax: 852 2603 5544
Email: cpr@cuhk.edu.hk
Website: <https://www.cuhk.edu.hk>
Product Description: The innovative fetal goat bone marrow mesenchymal stem cell secretome can efficiently and quickly repair skin wounds, inhibit scar formation, and effectively repair skin aging caused by ultraviolet radiation. Most importantly, it can increase the thickness of the stratum corneum and enhance the protective effect of the skin.
- Invention Name: Universal 3D Tissue Imaging & Analysis Methods** 1D-E07
Tel: 852 3943 7000
Fax: 852 2603 5544
Email: cpr@cuhk.edu.hk
Website: <https://www.cuhk.edu.hk>
Product Description: We developed Next Generation Histology, a universal 3D tissue imaging & analysis platform based on novel chemistry. It features fast, affordable, scalable and automatable 3D multi-omics mapping of tissue - the first of its kind technology.

參展商名單 (按英文名稱排列)

Alphabetical List of Exhibitors

Invention Name: Self-healing Magnetic Slime Robot for Non-invasive Endoluminal Intervention in the Gastrointestinal System 1D-E09
Tel: 852 3943 7000
Fax: 852 2603 5544
Email: cpr@cuhk.edu.hk
Website: <https://www.cuhk.edu.hk>
Product Description: Magnetic slime robot is a soft robot that can non-invasively access the digestive tract to perform medical procedures. It adapts to diverse and dynamic environments inside the body with minimized side effects.

Invention Name: RefluxChip — a Miniature, Battery-free Remote Sensing System for Real-Time Monitoring of Gastroesophageal Reflux Disease 1D-E11
Tel: 852 3943 7000
Fax: 852 2603 5544
Email: cpr@cuhk.edu.hk
Website: <https://www.cuhk.edu.hk>
Product Description: Gastroesophageal reflux disease refers to reflux of stomach contents causing symptoms to patients. In HK, ~1/9 people suffer from GERD symptoms monthly. RefluxChip is a miniature battery-free remote sensor for GERD diagnosis. It harvests energy from refluxed stomach acid to power itself, eliminating the hazard and constraint of conventional batteries.

Invention Name: Novel Sustainable Inorganic Hollow UV Filters for Cosmetic Applications 1D-D14
Tel: 852 3943 7000
Fax: 852 2603 5544
Email: cpr@cuhk.edu.hk
Website: <https://www.cuhk.edu.hk>
Product Description: Hollow, mineral-based microspheres that act as physical UV filters in sunscreen. These pure inorganic filters not only enhance UV-ray scattering efficiency but also address tackle sunscreens' microplastics issues and overly thick texture and unwanted white marks of conventional physical filters. Moreover, they are safe for both humans and wildlife.

Invention Name: ARIA-diabetes risk 1D-E13
Tel: 852 3943 7000
Fax: 852 2603 5544
Email: cpr@cuhk.edu.hk
Website: <https://www.cuhk.edu.hk>
Product Description: Undiagnosed diabetes is a global health issue. While many diagnostic tools for diabetes rely on metabolic indices and are subject to considerable variability, retinal images represent a stable marker of overall glycemic status. ARIA-diabetes risk as a digital approach provides a fast, convenient, and non-invasive technique for community health applications. It is ideal for undiagnosed diabetes prescreening.

The Education University of Hong Kong 香港教育大學

Invention Name: An Intelligent Ocular Misalignment Measurement System 1D-E15
Tel: 852 2948 7507
Email: kt@eduhk.hk
Website: <https://www.eduhk.hk/KnowledgeTransfer/en/index.html>
Product Description: This fully automated machine measures ocular misalignment, with enormous potential to help mitigate the shortage of eye professionals and provide an objective method with high granular measurement.

Invention Name: Nano-Sensor System for Meat and Seafood Monitoring 1D-D16
Tel: 852 2948 7507
Email: kt@eduhk.hk
Website: <https://www.eduhk.hk/KnowledgeTransfer/en/index.html>
Product Description: This is a new and convenient way to monitor food safety, with a series of chemo sensors to detect the chemical substance released from rotting food and a device that monitors food quality.

Invention Name: Rapid Quantification of Microplastics Using Total Organic Carbon Analysis with Simple Sample Pre-treatment 1D-D18
Tel: 852 2948 7507
Email: kt@eduhk.hk
Website: <https://www.eduhk.hk/KnowledgeTransfer/en/index.html>
Product Description: An all-in-one semi-automatic sample pre-treatment device that can efficiently and accurately quantify microplastic abundance in water and slug samples.

The Hong Kong and China Gas Company Limited 香港中華煤氣有限公司

Invention Name: Smart Controller 1D-C22
Website: <https://www.towngas.com/en/Home>
Product Description: By retrofitting the Smart Controller to a conventional gas-stove, customer can enjoy the benefits of smart cooking without appliance replacement. This IoT enabled product provides a more economical and environmental way for customers to enhance the cooking safety and convenience, and especially suitable for elderly users and their carers.

Invention Name: Smart Kitchen Solution 1D-C24
Website: <https://www.towngas.com/en/Home>
Product Description: Smart Gas Kitchen is a turnkey solution enhancing the cooking convenience and safety. By using IoT technology, customers can use one single app to remotely monitor and control the gas stove, gas water heater and rangehood. Besides, the consumption profile record also helps users to achieve gas and water saving.

Invention Name: Smart Safety Gas Meter 1D-C26
Website: <https://www.towngas.com/en/Home>
Product Description: Smart safety gas meter equips with IoT technology and special algorithm which can deduce gas leakage based on the consumption pattern. Once abnormality is identified, it will shut off the internal valve and instantly send alert message to the gas supply company for follow up via wireless communication network.

The Hong Kong Polytechnic University 香港理工大學

Invention Name: Autonomous-legged Robotic Dog Providing Navigation Support for the Blind 1D-D17
Tel: 852 3400 2929
Email: info.kteo@polyu.edu.hk
Website: <https://www.polyu.edu.hk/en/>
Product Description: Guide dogs are important for individuals with severe visual impairments (VIP). However, they face constraints such as slow breeding, high training costs, and pre-defined guide routes. This innovation successfully develops and adopts a robotic autonomous-legged dog to replace guide dogs for VIP navigation in densely populated city area.

參展商名單 (按英文名稱排列)

Alphabetical List of Exhibitors

Invention Name: Light Field Microscope Imaging and 3D Visualizing System 1D-D23

Tel: 852 3400 2929

Email: info.kteo@polyu.edu.hk

Website: <https://www.polyu.edu.hk/en/>

Product Description: Our revolutionary 3D Light Field Microscope integrates advanced light field technology with precision optics. Unlike conventional light microscopes, it captures multidimensional data, facilitating real-time 3D visualization and video of living samples. Its applications span from cellular imaging, tissue analysis, dermatology, to ophthalmology, opening new frontiers in biomedical research.

Invention Name: ZC-01TM: Fully Automatic Commercial Washroom Cleaning Robot 1D-D20

Tel: 852 3400 2929

Email: info.kteo@polyu.edu.hk

Website: <https://www.polyu.edu.hk/en/>

Product Description: ZC-01 is an AIoT robot dedicated to the cleaning of commercial washrooms. ZC-01 uses non-visual LiDAR and infrared sensors for cruise control and can clean toilets and urinals in a contactless way, with drying, UV sterilization, and floor-cleaning functions. Before cleaning, ZC-01 can detect and open the toilet lid.

Invention Name: AI Ambassador (Digital Human Version) 1D-D22

Tel: 852 3400 2929

Email: info.kteo@polyu.edu.hk

Website: <https://www.polyu.edu.hk/en/>

Product Description: AI ambassador is a customer service AI that serve people in many ways such as enquiries, way-finding, triage and reception. It has been used in many areas including immigration dept, custom and exercise, hospital, university and more. It is an all-in-one engine combining most front ended technology such as ASR, TTS, NLP and LLM, Live animation generation lipsyn and facial expression.

Invention Name: AIoT Empowered All-Terrain Personal Vehicle for People with Disabilities 1D-D15

Tel: 852 3400 2929

Email: info.kteo@polyu.edu.hk

Website: <https://www.polyu.edu.hk/en/>

Product Description: The AIoT empowered all-terrain personal vehicle for people with disabilities has incorporated AI technology and cutting-edge features, enabling it to overcome the challenge of gaps, staircases, sand and grasslands. With an anti-collision system and precise remote control, users enjoy added convenience and safety in operating device from a distance.

Invention Name: Mixed Reality-based Radiotherapy and Imaging Simulation for Clinical Education and Services 1D-D19

Tel: 852 3400 2929

Email: info.kteo@polyu.edu.hk

Website: <https://www.polyu.edu.hk/en/>

Product Description: Hybrid Interactive Virtual Environment (HiVE) stands as a revolutionary mixed-reality (XR) classroom, seamlessly integrating hands-on practice with virtual immersion. It revolutionizes clinical education, fostering collaborative learning and co-creation, prioritizing 'human-to-equipment' and 'human-to-human' interactions. It provides ground-breaking radiotherapy rehearsals tailored specifically for children with cancer. This innovation sets a new standard for both clinical education and services.

Invention Name: Contrast-free Virtually-enhanced MRI for Precise Tumour Treatment in Carcinoma 1D-D21

Tel: 852 3400 2929

Email: info.kteo@polyu.edu.hk

Website: <https://www.polyu.edu.hk/en/>

Product Description: We plan to develop an AI-driven virtual contrast enhancement system for nasopharyngeal carcinoma (NPC) diagnosis and treatment. Our system gives AI-generated contrast-enhanced MR images from regular MR images. It aims to provide a cheaper and safer replacement to contrast agents for patients. Allowing faster and more accurate diagnosis and treatment planning.

The Radio Control Airplane Modeler Sport Association 1D-F50

Invention Name: BeachGuard Flye

Tel: 66 2809 2900

Fax: 66 2809 3763

Email: contact@rcsadev.com

Website: pwmdrone.com

Product Description: The BeachGuard Flyer is an innovative rescue drone tailored for Thai Beach, equipped with advanced surveillance and rapid life-saving equipment deployment capabilities, significantly reducing rescue response times and enhancing safety for beachgoers with its autonomous and manual operation modes.

Tranquility Acoustronics (HK) Limited 1D-C28

凌波怡聲 (香港) 科技有限公司

Invention Name: Acoustic metamaterials based ventilation silencers

Tel: 852 9472 5814

Email: ang@ust.hk

Website: www.acoustists.com

Product Description: (1) Highway ventilation noise barrier tunnel that provides 180-degree full blockage and over 15 dB reduction of traffic noise while maintaining natural wind dispersion of vehicle emission. (2) Silent highspeed hair drier having comparable performance as the world leading brands while emitting 10 dB less noise.

Wuhan University of Technology 1D-A10

武漢理工大學

Invention Name: A Method for Coverage Path Planning of Unmanned Vessels

Product Description: The coverage path planning of unmanned boats is a key technology for achieving autonomous navigation of ships. In response to the problems of path discontinuity and low collaborative coverage efficiency in traditional coverage path planning algorithms, this project designs an unmanned boat coverage path planning method, which has achieved significant improvements in operational efficiency and quality, effectively promoting the development of the shipping industry towards efficiency, intelligence, and safety.

The Hong Kong Federation of Youth Groups 1D-E29

香港青年協會

Room B-E, 11/F, Genesis, 33-35 Wong Chuk Hang Road, Hong Kong

Tel: 852-39568001

Email: sic@hkfyg.org.hk

Website: <https://sic.hkfyg.org.hk/>

Product Description: Incubation To provide seed money, co-working space, mentorship support, training and such like to greater cost savings.

Brand Name: Flectothink;

Product Description: 公司有腦電和肌電兩條產品線。
腦電產品線主要基於更輕、更薄的材料和領先的演算法實現對使用者睡眠的精准監測和調控。目前已推出了在精准度上可以媲美多導睡眠監測儀（睡眠金標準）的可穿戴式腦電睡眠監測設備，提升使用者深睡沉浸度的深度睡眠干預功能已經開發完成。
肌電產品線主要利用基於肌電信號採集解碼的立體手勢識別技術，以肌電手環的產品形態，為增強現實設備、元宇宙提供新一代人機交互介面，目前該產品線的最小可行性產品製作工作已經完成，且已經在今年春季上海國際車展對外展示產品已實現的車機交互功能。
